

# Azure VMware Solution

Run VMware Cloud Foundation (VCF)  
Private Clouds in Azure

Ruth Magyar  
Kevin Jellow  
Conner Loving

# Why customers move VMware workloads to Azure

Licensing concerns

Datacenters expiry and software end of life

Urgent capacity needs

Security threats

Avoid software and hardware refresh

Budget and resource constraints

Extend and scale apps

## Your organization today

- Existing VMware on-premises environment
- Existing VMware skillsets
- Existing VMware subscriptions

## Azure benefits

- Price protection
- Business and IT agility
- Global scale and elasticity
- Increased security and resiliency
- Proximity to data & AI services
- Platform for developer innovation
- Sustainability and carbon reduction

# Migrate to modernize

# Azure VMware Solution

Your fastest path to the cloud

## Accelerate, modernize, simplify

1

Migrate fast  
without refactoring

2

Innovate applications  
at your own pace

3

Achieve better  
performance and security

4

Leverage existing  
Microsoft licenses

# What you get with Azure VMware Solution

## **Fastest migration option**

- ✓ Migrate VMware workloads “as-is”
- ✓ No refactoring or application modifications required
- ✓ Support from expert migration partners

## **Familiar, consistent VMware technology**

- ✓ Use VMware tech stack and VCF subscriptions on Azure infrastructure
- ✓ Included technology: vSphere, vSAN, NSX, HCX, and Aria
- ✓ Continue to leverage existing VMware expertise

## **Fully-managed, first-party Azure service**

- ✓ Azure provides support, licensing, and billing
- ✓ Manage VMware resources through the Azure portal
- ✓ Add capacity in minutes “VMware as a Service”

# Migrate fast without refactoring

Your datacenter

Azure

Migrate with  
VMware tools  
like vMotion

Connect via  
Azure  
ExpressRoute  
or a VPN

Symmetry with your on-premises stack

# Free up resources

## VMware on premises

Allow resources to spend more time focusing on tasks that add higher value to your organization.

## VMware in the cloud

# Achieve better performance and security

Respond rapidly in a  
dynamic world

Bolster reliability  
and performance for  
VMware workloads

Gain enterprise-grade  
compliance and security

# Secure and defend your apps and data

## Identity & access management

Microsoft Entra ID  
(identity protection)  
Multi-factor authentication  
Role-based access control

## Data protection

Encryption  
(disks, storage, SQL)  
Azure Key Vault  
Azure confidential  
computing  
Azure Files and  
Azure NetApp Files  
data protection

## Network security

ExpressRoute  
Virtual WAN  
Route Server  
Virtual Gateway

## Threat protection

Microsoft Defender for  
Cloud  
Microsoft Antimalware  
for Azure

## Security management

Azure Log Analytics  
Microsoft Sentinel

# Azure VMware Solution: One product, two ways to purchase

|                     | AVS w/ VMware subscription included | AVS w/ a portable VCF subscription |
|---------------------|-------------------------------------|------------------------------------|
| AVS managed service | ✓                                   | No difference                      |
| VMware tech stack   | ✓                                   | No difference                      |
| AVS pricing         | ✓                                   | Slightly lower price w/BYOS        |
| Support             | ✓                                   | Both supported by Microsoft        |
| Purchasing          | Microsoft only                      | Microsoft & VMware                 |

The State of Alaska expanded access to digital government services by migrating to Azure VMware Solution, further positioning itself for rapid modernization and innovation.

## 1 Situation

The State of Alaska had a vision to be an innovator in digital public services by expanding access to constituents spread across distributed population centers and vast geography.

Migration was a necessary step to overcome the limitations of its outdated on-premises infrastructure.

## 2 Solution

Alaska implemented a “migrate and modernize” strategy, enabling its teams to prioritize high-value tasks over expensive hardware upgrades and service fixes.

A contract with Microsoft, encompassing modernization, security, and workforce development, accelerated Alaska’s digital transformation and migration to Azure.

## 3 Results

Within three months, Alaska successfully migrated 700 applications and 1,200 servers.

This led to improved infrastructure resilience, fostered inter-departmental transparency and collaboration, optimized costs, and expanded government participation for remote residents.

“As we move assets into Azure, other services have become available. We’re unlocking the additive value of all these capabilities and achieving best practices much more quickly.”

— Bill Smith: Chief Information Officer, State of Alaska

# Azure VMware Solution global availability

Azure VMware Solution  
Now available in 33 regions

Azure IaaS  
Now available in more than 60+ regions

# Cloud destinations for VMware workloads

## Azure VMware Solution

Fastest path to the cloud

**Use VMware technology stack on Azure** for symmetry with on premises

---

**Retain VMware skills,** familiar tooling

**Migrate quickly/datacenter exit,**  
no application modifications required

---

**VMware technology stack included,**  
no VMware subscription required

## Azure IaaS and PaaS

Start modernizing

**Shift to Azure compute, storage,  
and networking infrastructure**

---

**Leverage Azure and cloud skills**

**Modernize with flexible** IaaS and PaaS  
services (e.g., **Azure Virtual Desktop,  
SQL Database**)

---

No VMware subscription required
